### Practice checkpoint

Explain saved in your own words. Give one example and one common mistake. Then open the MAGIVOX topic test for this section.

# 11. Interview Handoff

### What to learn

- Review JD
- Review submitted resume
- Prepare project stories
- Prepare questions

## Practice checkpoint

Explain review jd in your own words. Give one example and one common mistake. Then open the MAGIVOX topic test for this section.

# Worked Examples

### Weak bullet

```
Worked on Power BI dashboard.
```

### Stronger truthful pattern

```
Built a Power BI dashboard using sales data to compare revenue by city and product.
```

### JD match

```
If the JD asks for SQL joins and you have practised joins, include SQL and a project
bullet showing that use.
```

# Interview Answer Pattern

Use this structure for technical questions:

- 1. Definition - say what it is in one or two lines.
- 2. Why - explain why it is useful.
- 3. Example - give a small real or code example.
- 4. Difference/common mistake - compare with a related concept when relevant.
- 5. Be truthful - do not claim tools or experience you have not used.

# Final Course Checklist

- I can explain the foundation without notes.
- I completed examples by typing/doing them myself.
- I completed topic tests and reviewed wrong answers.
- I completed at least one mini project or practical exercise.
- I can answer common interview questions in simple language.
- I am ready for the MAGIVOX 50-question final exam.
