Worked Examples

Self-intro structure

```
Background -> skills -> real project -> target role.
```

STAR

```
Situation: dashboard data was inconsistent. Action: cleaned types and duplicates.
Result: report matched validated totals.
```

Unknown answer

```
I have not used that directly yet. I know the basic concept and I would approach it by
...
```

Interview Answer Pattern

Use this structure for technical questions:

- 1. Definition - say what it is in one or two lines.
- 2. Why - explain why it is useful.
- 3. Example - give a small real or code example.
- 4. Difference/common mistake - compare with a related concept when relevant.
- 5. Be truthful - do not claim tools or experience you have not used.

Final Course Checklist

- I can explain the foundation without notes.
- I completed examples by typing/doing them myself.
- I completed topic tests and reviewed wrong answers.
- I completed at least one mini project or practical exercise.
- I can answer common interview questions in simple language.
- I am ready for the MAGIVOX 50-question final exam.
